

File Encryption

CREDIT INFORMATION CORPORATION

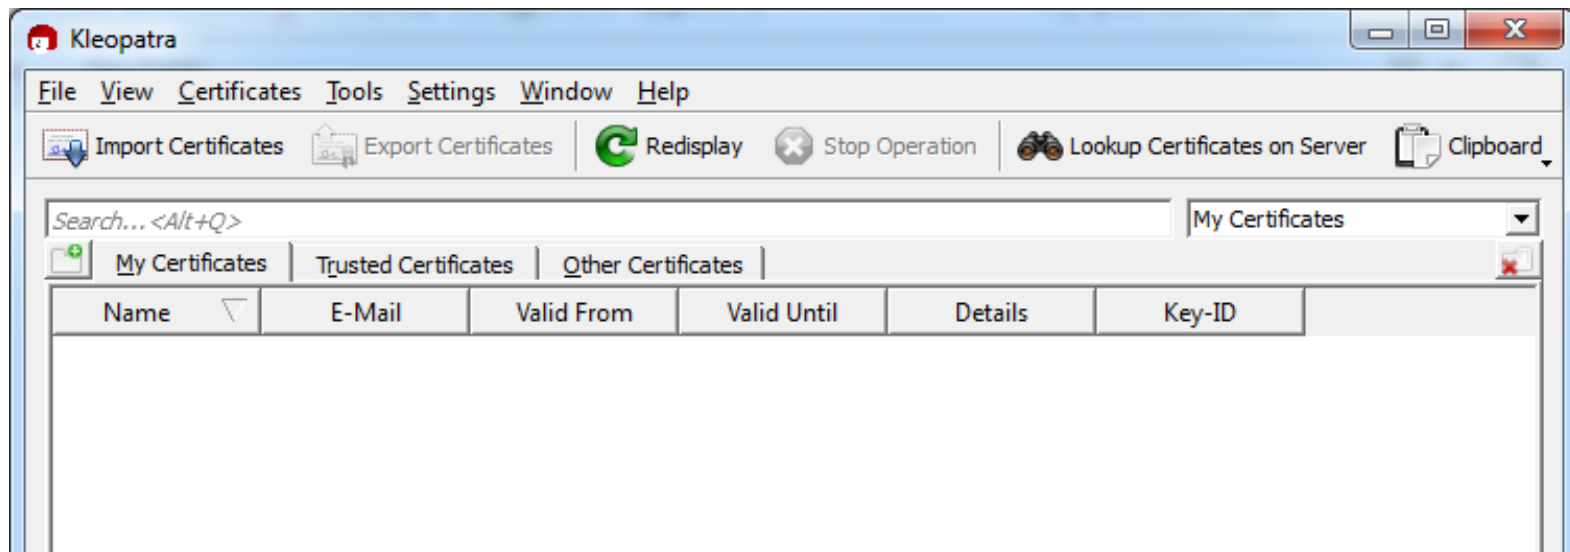

Installing the Encryption Software

1. Install the Encryption Software (Kleopatra)
2. Once Gpg4win 2.2.4 is installed on your computer, you have to import the Public Key (CIC_TestEnv_PubKey.asc) provided by CIC. This import operation must be done only once.

Submission Data File

Installing the Public Key

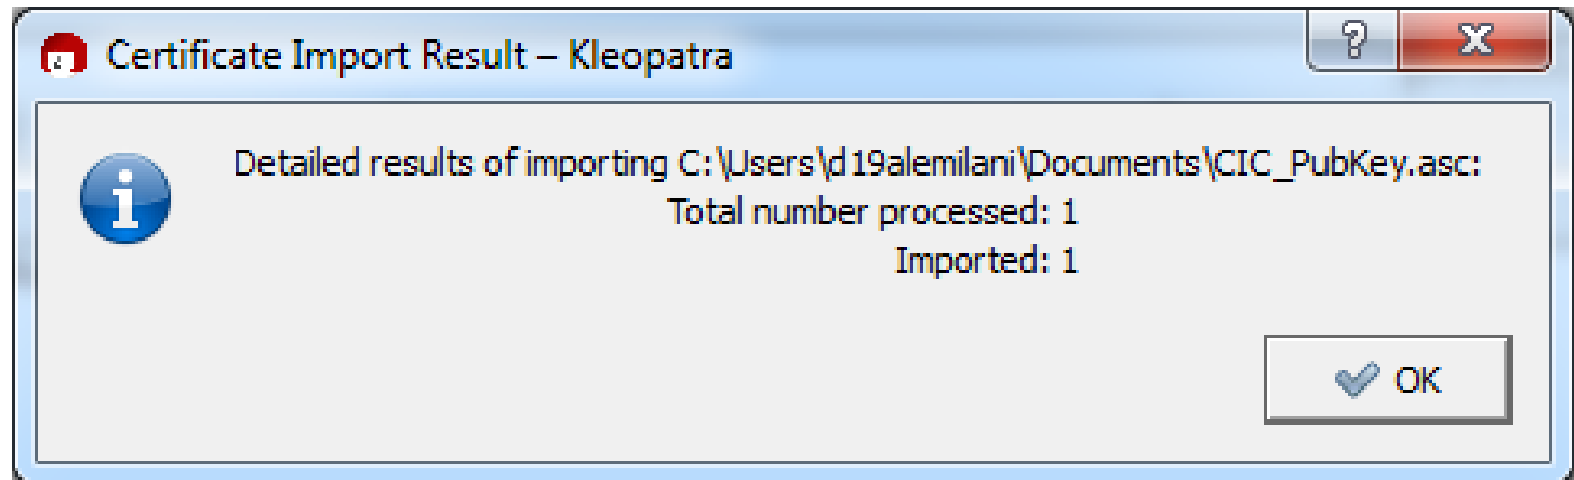

1. Open Kleopatra
2. Select "Import Certificates" and select the folder where you saved the file "CIC_TestEnv_PubKey.asc"

Submission Data File

Installing the Public Key

Select the Public Key provided by CIC and click Open

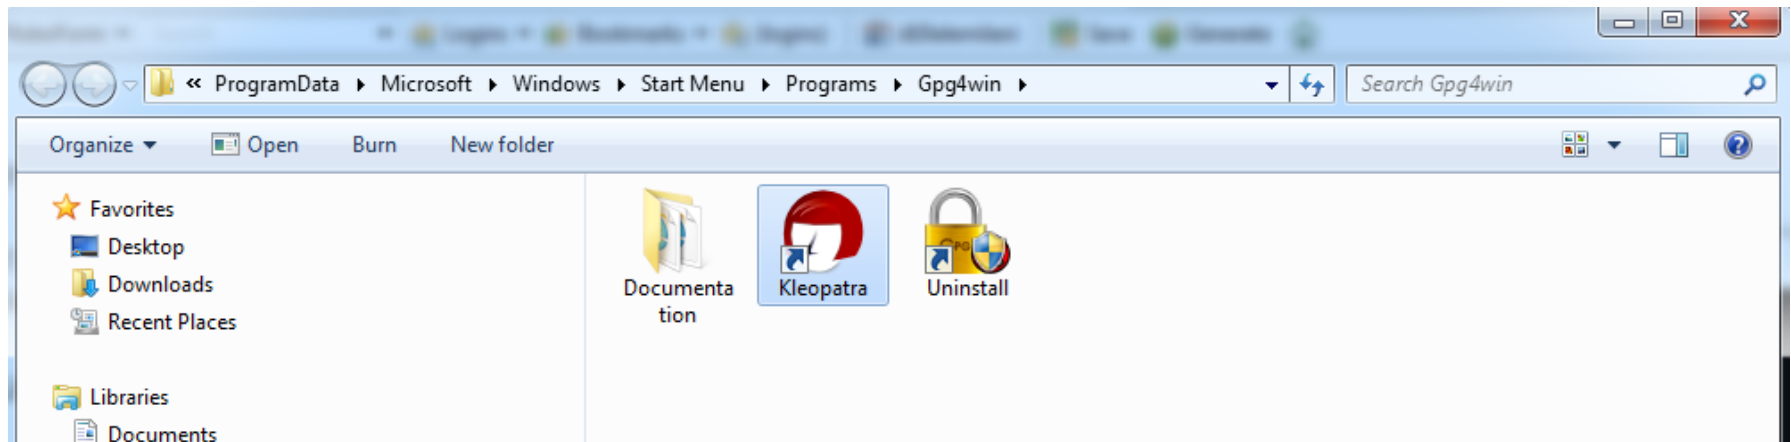

Click Ok. Now the certificate is imported.

Submission Data File
