Converting MS Excel File to Text File

How to Convert the MS Excel File to Text File

- 2. Remove the label per field type
- 3. Select File > Save As
- 4. Select in the box <u>Save as Type</u>: CSV Comma Delimited (*.csv)

File Name Format

The filenames for input file must follow this format: [ProviderCode]_CSDF_[Timestamp].txt

Where:

[ProviderCode] is the 8-alphanumeric long assigned Provider Number that identifies the Submitting Entity.

[Timestamp] must have the format YYYYMMDDhhmmss (Military Time) and it is the timestamp of the creation of the file.

Example of valid filenames are therefore: BANK1234_CSDF_20150130143010.txt PRVD9999_CSDF_20141229030101.txt

File Compression

How to Compress the Text File

- In Windows Explorer, right-click the text file, click "Send to"
- 2. Click "Compressed (Zipped) Folder"; a zipped version of the file will be created and saved with similar name but using a .zip extension.

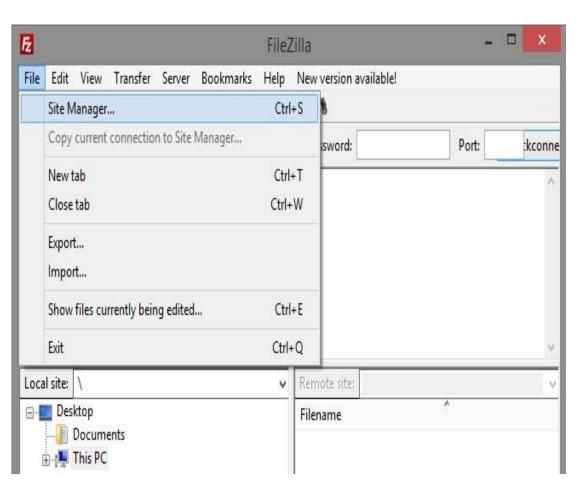

File Encryption
